

TRACK: InfraGard Track / Cyber-crime, terrorism, and information warfare
SESSION #: TBA
DATE: Tuesday April 20, 2010
TIME: TBA
SESSION TITLE: "Perspectives on communication with regards to cell phones and alternate communication means"
SPEAKER(S): Steve Flatley, CCFE – Forensic Examiner, NY CART (Computer Analysis Response Team)
ORGANIZATION: FBI

ABSTRACT: "Perspectives on communication with regards to cell phones and alternate communication means"

This presentation will outline the shifting trends towards cell phone and smart phone use and the unique problems they pose towards Law Enforcement and forensics in general. Also to be discussed will be the potential to use alternate means of communication, namely game consoles and iPods to circumvent Law Enforcement efforts.

SPEAKER BIO(S): Steve Flatley is a certified Computer Forensic Examiner with Federal Bureau of Investigation New York Office for the past 4 1/2 years. He is certified in Windows/Intel, Cell Phone/ PDA forensics, and Macintosh. He is also a certified FBI Instructor and regularly instructs Agents in the use of Access Data's FTK software. Prior to coming to the Bureau, SA Flatley was a programmer with 7+ years experience. He has a BS in Business/Computer Science from Boston College.
